

Aldes Middle East Thermostat for VAV solution

Aldes Middle East has launched its own Aldes branded thermostat for a simple and efficient room temperature control, terming it a complete and fully controlled Variable Air Volume (VAV) solution. Aldes says the thermostat has been developed for easy operation by the end user. The manufacturer lists the following product features:

- Digital display
- On/Off key
- (+)/(-) keys for temperature adjustments (in operation mode)
- Selectable Fahrenheit of Celsius scale
- Internal or external temperature sensor
- Lockable set point
- Energy saving mode
- Adjustment of output voltage signal as required
- Fully programmable menus

Aldes claims that the product that allows flexibility for the installer, who has the option to adjust/ control parameters based on the project needs. According to the company, it allows for a short lead time as well as cost effectiveness. The company says it provides a complete solution (manufacture, calibration & controls) along with strong technical support to the installer.
