

A new thermostat for a complete VAV solution

Always seeking to provide inclusive offers to its customers, Aldes Middle East now proposes a **complete** and **fully controlled** Variable Air Volume (VAV) **solution**. Already known on the GCC market for providing good quality VAV boxes with **in-house calibration** along with **technical support** to customers, Aldes Middle East launches its own **Aldes branded thermostat** for a **simple and efficient room temperature control**.

FEATURES

- Digital display
- ON/OFF key
- (+) / (-) keys for temperature adjustment (in operation mode)
- Selectable Fahrenheit or Celsius scale
- Internal or External temperature sensor
- Lockable set point
- Energy saving mode
- Adjustment of output voltage signal as required
- Fully programmable menus

ADVANTAGES

- Aldes branding
- Easy to use
- 2 outputs for cooling as well as heating instead of 1
- Easy installation
- Strong technical support
- Short lead time
- Cost-effective

It was also important for Aldes Middle East to develop a product that allows **flexibility for the installer**, who has the possibility to adjust/control parameters based on the project needs.

This thermostat definitely enables a **short lead time** (stock in the UAE) along with **cost-effectiveness**.

Aldes Middle East is not only providing a thermostat: Aldes Middle East is providing a complete solution (**manufacture, calibration & controls**), added to a strong technical support to the installer.
