

TAKE A LOOK

Aubin Academy Master Series: AutoCAD MEP 2011

The ideal book to provide readers with the skills necessary to create construction documents with AutoCAD MEP that are reflective of industry standards and expectations. This book focuses on the rationale and practicality of the process of creating projects in MEP.

7 QUESTIONS TO ASK

1. If my order quantities increase, will I receive a better price?
2. When will the order be delivered to site?
3. Has the product been used or tested in the GCC?
4. What guarantees are in place for the product?
5. What after-sales support is available?
6. Will we receive any installation advice or assistance?
7. Can the product be customised to suit our specific requirements?

ALDES AXIAL FAN HELIONE

ALDES' smoke exhaust axial fans come in one or two speeds and have a fire resistance of 200°C to 400°C, for up to two hours. The fans can be duct or wall-mounted and are well adapted for both low pressure and high airflows.

The fan systems are used in car parks and follow the same principles as a corridor smoke extraction system. In addition, they create a 'smoke free' layer above the floor, improving conditions and allowing for the safe escape/rescue of people.
