

TEQOYA protects you  
from indoor air pollution

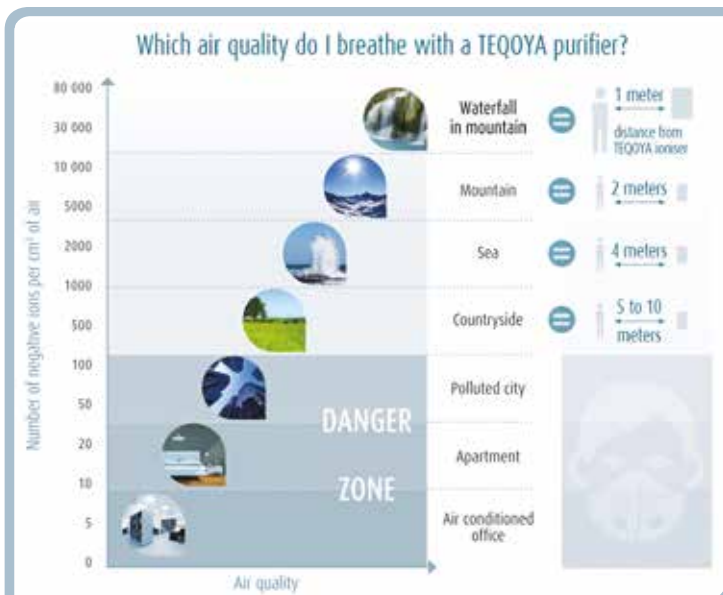

- > Air carries particles and gases but also many allergens, viruses, bacteria, odors ... **This high concentration of pollutant present in our homes is due to containment.**
- > **Indoor air is 5 to 10 times more polluted than outdoor air and that's where we spend nearly 80% of our time.** Our home represents 58 to 67% of our total exposure to fine and ultrafine particles.

## Airing is a great way to dilute pollution, but it doesn't eliminate it...

**TEQOYA** has developed air purifiers capable of delivering air with a quality similar to the one that can be breathed in the purest natural environments (Mountain, Sea, Countryside). Teqoya's technology is based on a **unique device generating significant negative ions producing neither Ozone (O3) nor Nitrogen Oxides (NOx).** Thus, this allows it to reproduce the natural conditions of healthy and clean air

Our innovation is based on the ionization of the air and a patented technology, developed and improved over more than 15 years.

The proximity of a TEQOYA air purifier provides us with healthy air, as can be experienced in the wild ... **More negative ions equals healthier air.**

## Indoor air pollution is not inevitable

Air pollution has significant effects on the environment but also on our health.

### Negative ions are true allies to our health thanks to proven benefits:

- Reduction of the effects of asthma and breathing difficulties
- Improvement of the quality of restful sleep
- Improvement of blood oxygenation, blood pressure and heart rate
- Regulation of serotonin production (stress and mood hormone)

### Teqoya 200

*Ideal for rooms up to 30 m²  
(15 m² for the most polluted environments)*

Discreet and silent, the Teq Air 200 is ideal in a room or in an office. Thanks to its 12 ion optics, the ionization is 30% more powerful (in comparison to our previous range), with 0 decibels and 1.5 Watts. Its brand new design allows a great adaptability.

>0.01 µm **Neutralizes up to 99%**  
of ultrafine particles and germs

**Completely silent**  
and draft free

**Discreet**  
it doesn't take much room

**Ultra low power consumption** (1,5 W)

**10-year warranty**  
(TEQOYA 200 and 450)  
with no scheduled obsolescence

**Guaranteed ozone free**  
with no production of additional pollutants

**Simple d'utilisation**  
no consumables

**100% Made in France**

**Satisfied or refunded**  
within 30 days

### Teqoya 450

*Ideal for rooms up to 50 m²  
(30 m² for the most polluted environments)*

The TeqAir 450 fits perfectly in large rooms (living room, dining room, meeting room). Thanks to its 24 ion optics, the ionization is 30% more powerful (in comparison to our previous range) with 0 decibels et 1.5 Watts. Its brand new design combined to its new performances allows it to fit in all

types of wide rooms.

### Teqoya Nomad

*For vehicles*

The TEQOYA Nomad car air purifier accompanies you everywhere and provides you with clean air in your vehicle. Portable and discreet, the car ionizer uniformly diffuses negative ions throughout the passenger compartment.

# Patented technology and French manufacturing

TEQOYA air purifiers eliminate up to 99% particles and germs

Fine  
particles

Viruses/  
Bacteria

Pollen

Pet  
allergens

Mould

Smells
